The sum asked for is not therefore an item of expenditure; butsimply an advante on account of future works.

27.--if these works now proposed are carried out, and allowance be made for others for which the necessity will probably seise from time to time, it would appear that it will be necessary. within the next few years, to expend on public works a sum little short of two millions of dollars. If to this be added the expenditure proposed by Mr. Chadwick on sewerage and water supply (\$750,000), we arrive at a total of \$2,750,000. If this be divided over five years, the average annual expenditure would amount to \$550,000, or allowing for contingencies, say 600,000. It is of course probable that Government may not carry out in their entirety the whole of the works now proposed. The question arises, how is this large expenditure to be met? I observe in the estimates of past years it is stated that the outlay on "Extraordinary Public Works" is to be defrayed from balances and premiums on land sales. It is, I think, my duty to call special attention to this matter. When the question of meeting the cost of the proposed works is under consideration, it is safer to over estimate rather than under-estimate the probable exp-aditure. I venture to recommend to the connderation of His Excellency the Officer Administering the Government what I can but regard as the inexpediency of depending, to a large extent at least, on the sale of Crown lands in order to meet the heavy outlay to which Government, is more or less committed. If land be forced upon the market, or sold during a sesson of financial depression, it is certain it will not realise anything like its real value. The colony would probably gain greatly in the long run by roising money on loan to cover any surplus required for extraordingry expenditure that cannot be paid from balances in hand or ordinary revenue. This would enable the Government to choose the best time for dispesing of those Crown lands which yet remain in its possession.

28 -It may be well to add that among the works included in the estimates now submitted. some of the more costly should prove highly remunerative, and the cost of others will be repaid by special rates. Of these I may enumerate the following :-COST TO BE REPAID. REMUNERATIVE WORKS. Central Market......\$270,000 

Public Laun ries

Public Estrines 17,000
Magazines for Explosives 17,625
Shaukiwan Market 3,000

9.—It will thus be seen that among the works good runs for their sides, prevented the Ciub included in the estimate I have now the honour to submit, amounting altogether to \$1,823,787. there are included works of a remunerative nature, or of which the cost will be repaid to Government, amounting to \$1,189,44%, i.e., nearly two-thirds of the total estimate.-- I have the honour to be, sir, your most obedient servant, S. FOOTBALL.

HONGKONG FOOTBALL CLUB v R.A. The Hongkong Football Club met a combine team of Royal Artillery and Royal Engineers resterday afternoon on the Racecourse. Play was not commenced till 4.45 p.m., a quarter of an hour after the advertised time. and even then the Club had to play two men short. In addition to this advantage the Military were slightly the heavier team, and so far as play and combination went showed rather better form then their opponents. The Military having won the toss started the ball from the Bowrington end, and the Club playing up emartly carried the ball back into their quarters immediately. For the first five minutes play was almost entirely confined to the Military quarters, and it was only the brilliant play on the part of their backs that prevented the Club from scoring. A smart run by Barker, backed up by Blair, created s diversion in favour of the Military, and taking advantage of this they managed to keep the ball in the next ten minutes in proximity of the Club goal. The Club's forward play was ON GERMANY.rather weak in passing, and as a result the goalkeeper had a fairly warm time of t. He managed, however, by some exceptionally brilliant play to keep his goal intact, till smart run by Blair, who passed to Tannabill, succeeded in lowering the Club's colours. One goal to the Military. The "leather" having been re-started, by a piece of bad luck on the part of the Club. combined with some rather careless play, the military team, by a straight shot from Bailey, were allowed to add another goal to their score within a couple of minutes. After this the game was of more even character. but it was apparent that the forwards of the Club, with one or two notable exceptions. were decidedly weak. Individually some smart rushes were made for their opponents' goal, but a want of combination and a very good defence prevented any results for the Club, and when half time," was called, the R.A. and R.E. team had two goals to their oredit. On play being remmed, the military combination again assumed the offensive, and but for some very effective play of Jackson and Thom on would have scored. After some loose picy. We take: pride in our in 1883 to \$22,200 roubles in a total trade in the estimates, but this must be regarded only ships and in our work; and we would rather work of 2,874,760 roubles. In 1889 the export by the cheaper cotton tissues, which amounted of these tissues amounted only to 217.940 roubles. The Moscow Gasetts, in articles on this subject, attributes the decay of the trade partly to the high rate of exchange and to the increase of the customs duties on raw cotton in Russia. It observes that the trade must not be regarded as hopelessly extinguished, and the new Siberian railway may possibly impart a new life to Rus-sian conmercial relations with China. If further urges Russian manufacturers and capitalists to combine for the purpose of reviving the trade at Kiakhta and of liberating the Chine e markets from the English monopoly now so damaging to Russian interests.
